

Options – 2D or Sculpted 3D

Sample of Standard 2 Level

Sample of Premium 3D Sculpting

- Most economical and common type
- Two surface heights – raised and recessed
- Backgrounds are typically ‘antiqued’ or darkened
- Raised areas have flat surfaces which are polished during production
- Recessed areas can have color added
- Faster turnaround resulting from less complicated artwork
- We also offer ‘multi-depth’ which includes a middle layer
- Multi-level includes an extra high level

- Most prestigious finished piece
- Rather than flat and vertical lines, the design is sculpted and rounded as necessary
- Artwork charge is higher and small additional charge applies per piece
- Very economical on larger orders
